

Chat Chains

A Social Emotional Learning Game

Rebecca Schulman Psy.D., BCBA-D
Anton Shcherbakov Psy.D., BCBA

Quick Start Instructions

Setup

1. Shuffle and create three piles of topic cards face-down.

2. Create two piles of response cards with the +1 sides face-up. The +2 sides can be used for more advanced play (see Gameplay Variations*).

*See full instructions for how to use additional cards and play advanced variations.

Goal: To have the longest, on-topic conversation

- 1 To start, a player selects a **topic card** and either answers it or asks another player to answer.
- 2 Each time a player asks a question, makes a comment, or answers a question, they place a **response card**, adding to the chain (see pg. 6 instructions booklet for a visual). The response card represents their addition to the Chat Chain.
- 3 Players can use a maximum of two **response cards** each turn.
- 4 The round ends when a player decides to end the conversation, goes off-topic, or takes too long to respond.

Scoring

Individual score: Add up the response cards each player used during the round

Team score: Add up all players' individual scores and the topic card points.
